Hello Stephane,

I was reading on the site you may have a set of original Marchal GT40 headlights. I've been looking for a long while for an original set.

If you do have a correct original set I would be interested in purchasing them along with any other original GT40 stuff you have.

Regards,
John Shaughnessy

Hi Stephane,

I'm interested in the headlights you posted and a set of the rear taillights. Could I receive better pictures of the headlights and the front glass on them with the markings on the glass.

Hi John, thanks. Will do this tomorrow and send you the pics.

For the glass, its very hard to take a clear pic as the light is reflected. Here are pics of a spare glass I have (removed from a rusty lamp) to try to help.

For the headlights, the TP21SP were used on french trucks in the 60's, this is why you can still , from time to time, find some NOS to come out. There are 2 models, one with no extra hole for the parking light and one with an extra hole. Let me know if you decide to go, wich model you want. Personnaly, i have fitted the ones with the parking lights on my GT.

Also, adding pics of fog lights (same story original ones and new). Not already sorted what I have but have a few for sale. Original ones 651 with the separate bulb holders are the ones on the pic but bulb holders are very hard to find (Marchal 9917). The best way to go is to have the specila version of the 651 with the iode buld holder iwh has the benefit to be iode and to be directly integrated on the lamp.

Hi Stephane,

Yes I know these lights very well as I own an original Mk.I Road car and I'm currently doing another one. The last set of original headlights were very expensive. Luckily I have the fog lights, but have been searching for headlights original's for many years now. I would be interested tho in having a few spare set of rear taillights as they are getting harder to find. I believe you posted that you have two sets of them?

Hi John, I wondered if you were this "Shaughnessy" who bought the barn find GT40, what a wonderful story and what a responsibility to own such a piece of the American history.

Unfortunately, the other set of rear tail lights is sold. As I received many messages and more than lights to sell, can you confirm your purchase of 1 set of rear tail light and 1 pair of headlights (if so let me know if you want a pair with the extra hole for parking light or no).

Other parts, not that much, and all these come from an old inventory I bought years ago. I live close to Monthlery race track and a lot of old garages have closed their doors with some inventory going to auctions.

I have a set of 3 old SW 240A, they need to be rebuilt, I can let them go for 300 EUR the 3 if any interest.

Also about tail lights, would be a miracle to find again nos stil boxes (even if miracle exist, you are the proof with your GT find). If any interest, I can have a look at 2nd hand ones, they come out rather easily here as they were mounted on the simca 1000 and tons of these models have been produced here in France. This is what I had on my GT and to be honest I preferred the look of old ones, with the patina on chrome, rather than new ones, on a car supposed to be 50 years old.

Waiting for your final order to be in position to answer other people.

Best

Stephane

Hi Stephane,

Yes I'm that shaughnessy.. I'll just buy a set of rear taillights for now and I'll buy all 3 of your 240A fuel pumps.

Could you send over pictures of the rear taillights and the 3 SW 240A pumps please. Do the taillights have the rubber gasket with them?

Yes I was lucky my car had the originals still in it from the factory, but for many years I've been looking for original spare set of headlights

Ok, will take pics. Just to mention and not related to this, but there are original rims (supposed to come from 1022) for sale on the french Craig list, if any interest.

Thank you!

Yes, I've seen those before being for sale, but to me is no value since it is such a strange item. I like original parts better.

Here are pics.

Few things : Fuel pumps, they are 4 + spares. I prefer to sell as a whole set, let me know if 400 usd for the whole set (as per the pic) is ok.

Tail lights : the seal that goes inside is in the box, the outside seal wich go on the metal part is not part of the box. I guess they were sold separately of the lamp. Anyway, if you want those, I should have some on used lamps, so not new but good shape. If it is a deal breaker, let me know, no worries.

Best

Stephane

The pumps at \$400.00 USD works for me for all of them. The taillights look good. For how much are you wanting for everything? How do you want to be paid. I'd prefer not to have to wire monies since it's a smaller amount of \$\$.

Price would be 929 USD + shipping. Let's make 900 USD + shipping cost. For payment, when I will be ready to ship, I will let you know the total cost and a Paypal payment could be the solution.

I found 2 rear seals for the tail lights, 1 new and 1 quite new. It looks really new but it isn't as it comes from a used light. So your set will be exactly as per Appendix V of gt40 spares catalog.

I will be busy next week, so not sure to be in position to prepare the packages but between christmas and new year, I am normally on vacation, so should have time to pack.

I'm in rush receiving the parts as long as we have a deal on them. I'd prefer until after the first of the year anyways as I'm traveling as well. If the parts send out the first or second week of the new year that is good with me.

Hi John, few things :

Your packages are ready. I separated light and fuel pumps, so 2 packets (and even I am not very confident with the fuel pumps in only 1 package as they are very heavy.

Anyway, to calculate cost for shipping, let me know if you want to go through an "express delivery" like UPS, Fedex, DHL or normal Posts process?

Also, as there will be custom duties, do you want a specific amount on the invoices. The default of lowering the values is that, in case of a damage to the items, the insurance will only cover the amount on the invoice.

Let me know

Hi Stephane sorry for delayed response.

I'm good with either or on the importation and the shipping. You tell me which works best for you.

Hello John,

I was looking in my emails to finish the dispatching process of the lights sold and I see that I don not have your adress and phone number. Could you provide them please.

Basically, you have 2 boxes :

Lights package is 36x17x17 (all in centimeters) and light in terms of weight

Pump package is 40x32x22 (centimeters) and weight is 10.1 kg.

And to get the final cost, I then need your details..In my current simulations, we will be around a bit less of 200 euros through UPS for both.

Best regards

Hi Stephane,]

No worries mailing address would be
3303 West Harvard St.
Santa Ana CA 92704.

Please let me know cost of shipping. Sorry for being late on responses. I'm currently not in town.

Hi John, I have given your packages to UPS this morning. It is an UPS access point, so according to what I recently saw when sending the other lights to people in the USA, it takes approx 1 day for the packages to reach the central depot and something like 5-6 business days to reach the delivery address.

For the lights : Tracking is : **1ZY9T06C6700001813**

For the pumps : Tracking is : **1ZY9T211DG90070059**

For the final price, we said 900 USD + shipping. Shipping cost went at 183.90 euros, basically 200 USD. So a total of 1100 USD. Then, when convenient for you, you can send the payment to my paypal account : stephane.gorla@sfr.fr.
