Product Description

Bunting Bearings offers a complete line of stock plain bearings, flange bearings and washers made of P/M bronze. Bunting sintered bronze stock bearings have long conformed to ASTM chemical and physical properties, and are the first to include all ASTM standard sizes to ASTM recommended dimensions and tolerances. After forming, sintering and sizing, the bearings are vacuum impregnated with SAE 30 oil that provides lubricant which is metered from the bearing to the shaft during rotation. Standard off-the-shelf oil impregnated bronze bearings should function satisfactorily in temperatures ranging from 10°F to 220°F.

Looking for specific info?

Ask Rufus or search reviews and Q&A

What material is it made of? Can it withstand high temperatures? Is it resistant to corrosion?

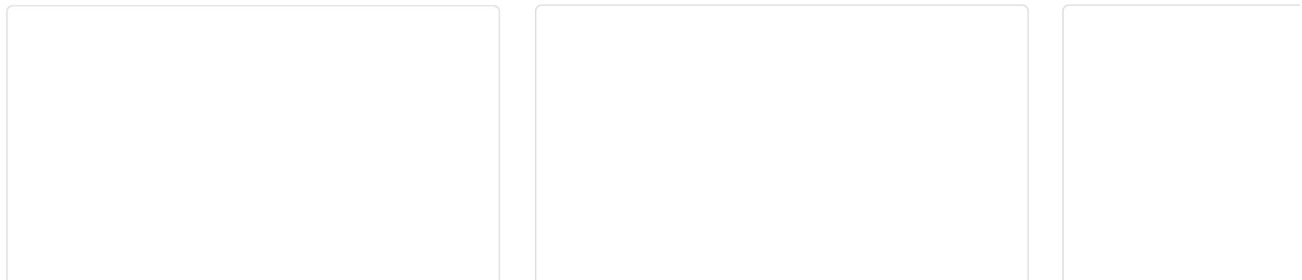

Does it require maintenance? Is this bearing self-lubricating?

 Exactly what was advertised. These bushings allowed me to repair my rims for our sprayer.

**Stephen Anstadt**  
**Tight fit on 5/8 OD**  
 Reviewed in the United States on August 30, 2023  
**Verified Purchase**  
 Tight fit for bushing 5/8 OD going in to center of Wood River CBN grinding wheel to fit on the 1/2 shaft of the Grizzley sharpener. Bushing had to be tapped in, however for this application I prefer a tight fit. Only needed 1 but came with 3. This helped a lot to upgrade from a wet stone to a CBN wheel as I could not find a cbn wheel with 1/2 center.
