Total		\$3,349.98	

Upgrade Davis Technologies EFI-TC2 add \$400.0 [EFI-TC2](#)

MoTeC EFI System(s)

<u>Description</u>	<u>Part #</u>	<u>Price</u>	<u>Web Location</u>
MoTeC M130 ECU	M130	\$2,340.00	M130
M1 GPA License	JRR 23061	\$780.00	JRR 23061
USB socket/cable	JRR SP23481	\$35.64	JRR SP23481
Drive by Wire Option	JRR M880	\$455.00	JRR M880 DBW EN
Traction Control Option	JRR M84	\$345.00	JRR M84
Total		\$3945.64	

Above does not have any wiring harnesses

MegaSquirt

<u>Description</u>	<u>Part #</u>	<u>Price</u>	<u>Web Location</u>
MS3-Pro	MS3-Pro	\$1,199.00	ms3-pro

The above comes with an 8 ft flying lead, which means you need to splice the connections for your engine. I have talked with them and they said that if you send them for example a wiring harness for an LS1 they would make a custom wiring harness for you. You would have to ask them for pricing.

Racelogic

The only pricing I could find was \$1,010.00–\$1,955.00 from [Maximum PSI](#)

There may be others on the web but this is a good idea of pricing each unit.

AME

[AME Units](#) sold at Level X Motorsports. The reason I gave the Link for all units is so that people may choose what unit works for them. They range from \$1,290.50 to \$3,334.32 and at this time they are discounted

Notes:

- 1) Both the Holley and Megasquirt come with software to learn how to tune your engine. MoTeC does not, you will have to get someone to tune your engine.
- 2) Megasquirt does not come with drive by wire. If you use OEM ECU you can use Drive-by-Wire. The others have been priced with drive by wire.
- 3) The reason for the date in the top right hand corner is that if at a later date you should check for new price changes.

Also found the following:

- 1) O2 Sensor that can handle Lead [at www.lingenfelter.com](http://www.lingenfelter.com) \$77.72 and specialadditions.com \$29.00
- 2) Brand new [LSx New Wiring Harness](#) starting at \$495.00 to \$750.00
