Brand	Edelbrock
Manufacturer's Part Number	35210
Part Type	Fuel Injection Systems
Product Line	Edelbrock Pro-Flo 2 EFI Systems
Summit Racing Part Number	EDL-35210
EGR	No
Injection Style	Sequential multi-port
Metering Style	Speed density (Map-N) and speed throttle (Alpha-N)
Intake Manifold Included	Yes
Intake Section Included	Complete
Intake Material	Aluminum
Intake Finish	Natural
Engine Block Style	Stock/OEM standard deck
Fuel Rails Included	Yes
Throttle Body Included	Yes
Throttle Body Mounting Flange	4-barrel square bore
Venturi Quantity	4
Airflow Rate (cfm)	1,000 cfm
Throttle Body Material	Cast aluminum
Throttle Body Finish	Natural
Injectors Included	Yes
Injector Size (lbs/hr)	29 lbs./hr.
Calibration Module Included	Yes
ECM Included	Yes
Wiring Harness Included	Yes
Oxygen Sensor Included	Yes
Fuel Pump Included	Yes
Fuel Pressure Regulator Included	Yes
Distributor Included	Yes
MAP Sensor Included	Yes
IAT Sensor Included	Yes
TPS Sensor Included	Yes
IAC Motor Included	Yes
Quantity	Sold as a kit.
Notes	A laptop or PC is required for initial flash set-up. A CD and USB hook-up are included. Designed for the standard 302 firing order.

Convert to an efficient fuel injection system with Edelbrock Pro-Flo 2 EFI systems.

Go from your carbureted engine to a complete, fully-sequential fuel injection system with Edelbrock Pro-Flo 2 EFI systems. These all-new Pro-Flo 2 systems include everything you need to convert to a modern, more powerful fuel injection system. The Pro-Flo 2 EFI systems start with a state-of-the-art flash-programmable engine control unit (ECU) powered by EFI technology, a leader in advanced electronic engine management. They allow for more tuning features, fully sequential injector firing, and limitless calibrations for improved fuel economy and incredible horsepower. Included with the Edelbrock Pro-Flo 2 EFI systems is a complete bolt-on, ready-to-go intake manifold system matched with an exclusive handheld calibration module for tuning on the fly or, if you prefer laptop tuning, the Pro-Flo 2s offer that option as well. Edelbrock Pro-Flo 2 EFI systems are available with two tuning strategies, speed density, and alpha-N, along with base calibrations for your AMC/Jeep, Chevy, Ford, Chrysler, or Pontiac application.

The complete Pro-Flo 2 EFI packages also include:

- * Intake manifold
- * Throttle body assembly
- * Fuel rails
- * Fuel injectors
- * All sensors
- * Wiring harness
- * ECU
- * Hand-held calibration module
- * Software
- * Brackets
- * Attaching hardware
